

High Performance Textiles Woven

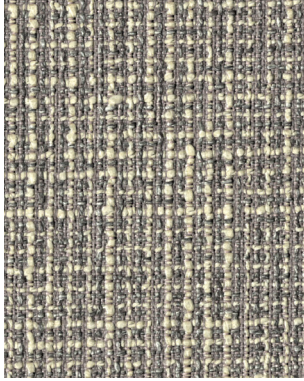

DESIGNTEX

Hard working solids and textures for high traffic environments

Most Made in the USA
High Abrasion
Disinfectant Treatable
No PFAS
No Antimicrobials
No Flame Retardants
No Harmful Phthalates
Proposition 65 Compliant
No PVC
Low VOC
SCS Indoor Advantage or
GREENGUARD Gold Certified
HPD Accountable
LEED Building Criteria Contributor
WELL Building Criteria Contributor
Mindful Materials Compliant

Cleaning Codes

WM Clean only with water-based detergents or mild solvent-based cleaners using the minimum amount of liquid. Do not use harsh solvents.
WS Clean only with water-based or solvent-based cleaner. Do not saturate.

Disinfectant Testing

All products have been tested with a variety of disinfectants (alcohol, hydrogen peroxide, quaternary ammonium). Scan the QR code below for specific test results.

Flammability

All textiles comply with California TB 117-2013.
Multi-use textiles also comply with ASTM E 84 Unadhered Class A, UL Listed.

Abrasion

Abrasion has been tested with the Wyzenbeek method using either cotton duck (CD) or wire screen (WS) as the abradant, or the Martindale method using worsted wool as the abradant. ACT guidelines require at least 30,000 Wyzenbeek double rubs or 40,000 Martindale cycles for woven upholstery, or 50,000 Wyzenbeek double rubs for coated upholstery in heavy duty single-shift application. Multiple factors affect fabric durability and appearance retention, including end-user application and proper maintenance. Abrasion test results exceeding ACT Performance Guidelines are not an indicator of product lifespan.
