Cleaning Codes

WM Clean only with water-based detergents or mild solvent-based cleaners using the minimum amount of liquid. Do not use harsh solvents.
WS Clean only with water-based or solvent-based cleaner. Do not saturate.

Disinfectant Testing

All products have been tested with a variety of disinfectants (alcohol, hydrogen peroxide, quaternary ammonium). Scan the QR code below for specific test results.

Flammability

All textiles comply with California TB 117-2013.
 Multi-use textiles also comply with ASTM E 84 Unadhered Class A, UL Listed.

Abrasion

Abrasion has been tested with the Wyzenbeek method using either cotton duck (CD) or wire screen (WS) as the abrasant, or the Martindale method using worsted wool as the abrasant. ACT guidelines require at least 30,000 Wyzenbeek double rubs or 40,000 Martindale cycles for woven upholsteries, or 50,000 Wyzenbeek double rubs for coated upholsteries in heavy duty single-shift application. Multiple factors affect fabric durability and appearance retention, including end-user application and proper maintenance. Abrasion test results exceeding ACT Performance Guidelines are not an indicator of product lifespan.
